Edward C. Banfield

The Moral Basis of a Backward Society

In post-World War II Italy, political scientist Edward C. Banfield visited an Italian town in 1955 which he called Montegrano. There, he observed a self-interested, family centric society that put the immediate family needs over the public good.

Banfield witnessed what was to become known as the “mafia.” He argued that the backwardness of the town was at least partially due to the villagers’ inability to act for their common good. He further concluded that Montegrano’s plight was rooted in the distrust, envy and suspicion among the villagers. Village life was more of a battleground than a community where all shared in the success of the village. As a result, there was an inability for the villagers to work together to solve common social problems, build an infrastructure, and address common economic concerns. Lack of a community is an important limiting factor in economic development, self-government by the citizens of the village, and a detriment to the public good.

Monica Ramirez Basco, Ph.D.

Never Good Enough

Dr. Monica Basco, a clinical psychologist, researcher, teacher and author, helps readers understand why you feel driven to get things “just right” and helps you make the best of your perfectionism.

- *Do you feel that no matter how hard you try it is never good enough?
- *Do you spend too much time trying to get things exactly right?
- *Does it seem that at any minute people will find out that you are not really what you seem to be?

If you answered yes to any of these questions, you may be struggling with perfectionistic tendencies. Having extremely high standards for yourself and others can leave you feeling let down -- over and over again -- when these expectations aren't met. As psychologist and researcher Monica Ramirez Basco explains, uncontrolled perfectionism can lead to depression, anxiety, low self-esteem, fear of failure, and broken marriages and friendships.

In *Never Good Enough* Dr. Basco helps you understand *why* you feel driven to get things "just right" and shows you how to make the best of your perfectionism. Filled with practical advice, encouragement, and strategies for self-discovery, this invaluable guide includes Dr. Basco's own thirty-question self-test that will help you recognize and manage the negative side of your perfectionism. You will learn how to stop the struggle with yourself and others, how to evaluate your worth and performance in life, and how to replace the pursuit of perfection with peace of mind.

Ernest Becker
The Denial of Death

Winner of the Pulitzer Prize in 1974 and the culmination of a life's work, *The Denial of Death* is Ernest Becker's brilliant and impassioned answer to the "why" of human existence.

In bold contrast to the predominant Freudian school of thought, Becker tackles the problem of the vital lie -- man's refusal to acknowledge his own mortality. In doing so, he sheds new light on the nature of humanity and issues a call to life and its living that still resonates more than twenty years after its writing.

Howard S. Becker
Outsiders, Revised

One of the most groundbreaking sociology texts of the 20th century, Howard S. Becker's *Outsiders* revolutionized the study of social deviance in the 1960s.

Becker became the first sociologist to insist that we study not just why people "misbehave" (such as by smoking weed) but also who gets to decide what's considered "normal" behavior. Sixty-five years on, *Outsiders* remains required reading in sociology and criminology courses.

In this newly revised 2018 edition, Becker has written two new essays for this edition, one charting how marijuana legalization came to be, and the other exploring how the discipline of sociology has changed over the past half-century.

"A sort of Richard Feynman of the social sciences, notable for his street smarts, his informal manner, and his breezy, pungent prose style.... The influence of Becker's early work remains profound."
– The New Yorker

"Becker is back with new reflections that take us into public opinion, the nature of knowledge, and the insides of social science history. As always, he shines with ethnography, with reflection, and in telling us how social science works – in real time, and, when it comes to it, for all time."
– Harvey Molotch, professor of sociology at New York University

"An exceptionally interesting and worthwhile contribution to the study of deviant behavior."
– American Sociological Review

Allan Bloom

The Closing of the American Mind

The brilliant, controversial, bestselling critique of American culture that “hits with the approximate force and effect of electroshock therapy” (*The New York Times*)—now featuring a new afterword by Andrew Ferguson in a twenty-fifth anniversary edition.

In 1987, eminent political philosopher Allan Bloom published *The Closing of the American Mind*, an appraisal of contemporary America that “hits with the approximate force and effect of electroshock therapy” (*The New York Times*) and has not only been vindicated, but has also become more urgent today. In clear, spirited prose, Bloom argues that the social and political crises of contemporary America are part of a larger intellectual crisis: the result of a dangerous narrowing of curiosity and exploration by the university elites.

Now, in this twenty-fifth anniversary edition, acclaimed author and journalist Andrew Ferguson contributes a new essay that describes why Bloom’s argument caused such a furor at publication and why our culture so deeply resists its truths today.

James P. Carse
Finite and Infinite Games

James P. Carse argues that there are at least two kinds of games – one is finite; the other infinite.

Finite games are the familiar contests of everyday life; they are played in order to be won, which is when they end. But infinite games are more mysterious. Their object is not winning, but ensuring the continuation of play.

What are infinite games? How do they affect the ways we play our finite games? What are we doing when we play—finitely or infinitely? And how can infinite games affect the ways in which we live our lives? Carse explores these questions

with stunning elegance through a universe of observation and insight, noting where and why and how we play, finitely and infinitely.

Along the way, Carse finds new ways of understanding everything, from how an actress portrays a role to how we engage in sex, from the nature of evil to the nature of science. Finite games, he shows, may offer wealth and status, power and glory, but infinite games offer something far more subtle and far grander.

Francis S. Collins
The Language of God

The Language of God provides the best argument for the integration of faith and logic since C.S. Lewis's *Mere Christianity*.

It has long been believed that science and faith cannot mingle. Faith rejects the rational, while science restricts us to a life with no meaning beyond the physical. It is an irreconcilable war between two polar-opposite ways of thinking and living. Written for believers, agnostics, and atheists alike, *The Language of God* provides a testament to the power of faith in the midst of suffering without faltering from its logical stride.

Readers will be inspired by Collin's personal story of struggling with doubt, as well as the many revelations of the wonder of God's creation that will forever shape the way they view the world around them.

"Collins's argument that science and faith are compatible deserves a wide hearing. It lets non-churchgoers consider spiritual questions without feeling awkward." -- The New York Times Book Review

"What an elegantly written book. In it Francis Collins, the eminent scientist, tells why he is also a devout believer....A real godsend for those with questioning minds but who are also attracted to things spiritual." -- Archbishop Desmond Tutu

William Damon
The Path to Purpose

One of the world's leading specialists on the transition from adolescence to adulthood and news-making author reports on a ground-breaking study revealing the deeply troubling finding that more young adults today than ever before are at high risk for "failing to launch" into happy and productive adulthood, totally at sea about what they want to do with their lives, well into their late 20s. He provides parents and educators powerful research-based advice on how to get them on track by helping them discover a life purpose.

Drawing on the revelatory results of a landmark study, William Damon -- one of the country's leading writers on the lives of young people, whose book *Greater Expectations* won the Parents' Choice Award -- brilliantly investigates the most pressing issue in the lives of youth today: why so many young people are "failing to launch" -- living at home longer, lacking career motivation, struggling to make a timely transition into adulthood, and not yet finding a life pursuit that inspires them.

He offers compelling portraits of the young people who are thriving and identifies the nine key factors that have made the difference for them, presenting simple but powerful methods that parents and all adults can and must employ in order to cultivate that energized sense of purpose in young people that will launch them on the path to a deeply satisfying and productive life.

Thomas Gilovich
How We Know What Isn't So

When can we trust what we believe—that "teams and players have winning streaks," that "flattery works," or that "the more people who agree, the more likely they are to be right"—and when are such beliefs suspect?

Thomas Gilovich offers a guide to the fallacy of the obvious in everyday life. Illustrating his points with examples, and supporting them with the latest research findings, he documents the cognitive, social, and motivational processes that distort our thoughts, beliefs, judgments and decisions. In a rapidly changing world, the biases and stereotypes that help us process an overload of complex information inevitably distort what we would like to believe is reality. Awareness of our propensity to make these systematic errors, Gilovich argues, is the first step to more effective analysis and action.

Gilovich is the author of *The Wisest One in the Room*.

Erving Goffman
Behavior in Public Places

Considered one of the most influential American sociologist of the 20th century, Ernest Goffman's uses public behavior in this book as a means to define his concept of gatherings and to show their importance in contributing to society and to how individuals are treated. He draws distinctions between several types of public gatherings (social occasions, situations) and types of audiences (acquainted versus strangers).

In diagnosing mental disorder, psychiatrists typically cite aspects of the patient's behavior that are inappropriate in the situation. Dr. Goffman instead makes the distinction between acts that are approved and acts that are felt to be improper in society. He explains the social norms that surround an action – those expectations and what is considered "normal" behavior which other people interpret and judge the individual's conduct. The book provides detailed observations of behavior -- body language or embarrassment during a conversation – and goes on to process this behavior in terms of what is acceptable in social settings.

Sandy Hotchkiss
Why Is it Always About You?

This classic book on narcissism shows readers how to protect themselves from controlling, immature, self-absorbed people in their personal and work lives, offering healthy coping strategies for rebuilding confidence and self-esteem.

In the normal course of relationships, we depend on others to affirm our sense of who we are. There are some people, however, who are incapable of this form of give-and-take. Spend enough time around these narcissists and anyone can start to feel invisible. In this groundbreaking book clinical social worker and psychotherapist Sandy Hotchkiss shows how to cope with such controlling, egotistical people and offers healthy strategies for rebuilding self-esteem.

Whether the narcissist in question is a co-worker, spouse, parent, or child, *Why Is It Always About You?* provides practical advice and strategies for survival for anyone struggling to break narcissism's insidious effect on everyday life.

Steven E. Landsburg
Armchair Economist, Revised Edition

In this revised and updated 2012 edition of Steven Landsburg's 1993 bestseller, Landsburg applies economic theory to today's most pressing concerns, answering a diverse range of daring questions, such as:

- Why are seat belts deadly?
- Why do celebrity endorsements sell products?
- Why are failed executives paid so much?
- Who should bear the cost of oil spills?
- How is workplace safety bad for workers?
- What's wrong with the local foods movement?
- Which rich people can't be taxed?
- Why is rising unemployment sometimes good?
- Why do women pay more at the dry cleaner?
- Why is life full of disappointments?

Whether these are nagging questions you've always had, or ones you never even thought to ask, this new edition of *The Armchair Economist* turns the eternal ideas of economic theory into concrete answers that you can use to navigate the challenges of contemporary life.

Steven E. Landsburg
The Big Questions

The author of the bestselling books *The Armchair Economist* and *More Sex Is Safer Now* now uses concepts from mathematics, economics, and physics to address the big questions in philosophy: What is real? What can we know? What is the difference between right and wrong? And how should we live?

Beginning with the broadest philosophical issues—theories of existence, knowledge, and ethics—Landsburg then turns to a dazzling variety of specific applications. He gives us a mathematical analysis for arguments for the existence of God; explains the real meanings of the Heisenberg uncertainty principle and Gödel's incompleteness theorem; and carefully dissects the meaning of social responsibility on the playground, in the marketplace, and in the voting booth.

Stimulating, illuminating, and always surprising, *The Big Questions* reveals the relationship between the loftiest philosophical quests and our everyday lives.

Steven E. Landsburg
Fair Play

Steven Landsburg uses economics to illuminate the mysteries of daily life, and using daily life to illuminate the mysteries of economics. In this book, Landsburg addresses issues like fairness, tolerance, morality and justice—issues that are as important on the playground as they are in the marketplace. With the help of his daughter, he contrasts the wisdom of parents with the wisdom of economists—not always to the credit of the latter.

How should we feel about taxes that redistribute income? Ask how parents feel about children who forcibly "redistribute" other children's toys. How should we respond to those who complain that their neighbors are too wealthy? Ask how parents respond when children complain that their siblings got too much cake. By insisting that fairness can't mean one thing for children and another for adults, Landsburg shows that the instincts of the parent have profound consequences for economic justice.

Along the way, Landsburg—with his customary sharp wit and challenging logic—pauses to reflect on an astonishing variety of issues in economic theory, the philosophy of parenting, the true nature of family values, and how to get the most out of life. He explains why children are a good thing, and why economic theory tells us we don't have enough of them. He meditates on the role of authority in our lives, the effects of cultural bias, and why it's important to read poetry to your children.

More Sex is Safer Sex, Revised

A witty and razor-sharp look at the many ways our individually rational decisions can combine into some truly weird collective results—and some hilarious and serious ways to fix just about everything.

In recent years, a band of economists have begun to explain ordinary behavior in plain and often entertaining terms. Steve Landsburg, bestselling author of *The Armchair Economist*, shows how the rational behavior of each one of us—when combined together—produces the often bizarre, seemingly irrational behavior of crowds. We all stand up at the ballpark, so none of us can see. We avoid casual sex, from fear of disease, and we thereby make sex more dangerous. Things really get interesting when Landsburg suggests ways to change the rules, and game the system. Why not charge juries if a convicted felon is exonerated? Why not solve the “overpopulation” problem by having more children, who will help think of ways to improve our use of resources?

More Sex Is Safer Sex will make you laugh and argue—and it will make you think about the world around you in new and unforgettable ways.

Dr. Armand M. Nicholi, Jr.
The Question of God

Throughout the ages, many of the world's greatest thinkers have wrestled with the concept of -- and belief in -- God. It may seem unlikely that any new arguments or insights could be raised, but the 20th century managed to produce two brilliant men with two diametrically opposed views about the question of God: Sigmund Freud and C. S. Lewis. They never had an actual meeting, but in *The Question of God*, their arguments are placed side by side for the first time.

For more than twenty-five years, Armand Nicholi has taught a course at Harvard that compared the philosophical arguments of both men. In *The Question of God*, Dr. Nicholi presents the writings and letters of Lewis and Freud, allowing them to "speak" for themselves on the subject of belief and disbelief. Both men considered the problem of pain and suffering, the nature of love and sex, and the ultimate meaning of life and death -- and each of them thought carefully about the alternatives to their positions.

The inspiration for the PBS series of the same name, *The Question of God* does not presuppose which man -- Freud the devout atheist or Lewis the atheist-turned-believer -- is correct in his views. Rather, readers are urged to join Nicholi and decide for themselves which path to follow

Josh Waitzkin
The Art of Learning

In the bestselling *The Art of Learning*, Waitzkin tells his remarkable story of personal achievement and shares the principles of learning and performance that have propelled him to the top—twice.

A public figure since winning his first National Chess Championship at the age of nine, Waitzkin was catapulted into a media whirlwind as a teenager when his father's book *Searching for Bobby Fischer* was made into a major motion picture. After dominating the scholastic chess world for ten years, Waitzkin expanded his horizons, taking on the martial art Tai Chi Chuan and ultimately earning the title of World Champion. How was he able to reach the pinnacle of two disciplines that on the surface seem so different? "I've come to realize that what I am best at is not Tai Chi, and it is not chess," he says. "What I am best at is the art of learning."

The Art of Learning takes readers through Waitzkin's unique journey to excellence. He explains in clear detail how a well-thought-out, principled approach to learning is what separates success from failure. Waitzkin believes that achievement, even at the championship level, is a function of a lifestyle that fuels a creative, resilient growth process. Rather than focusing on climactic wins, Waitzkin reveals the inner workings of his everyday method, from systematically triggering intuitive breakthroughs, to honing techniques into states of remarkable potency, to mastering the art of performance psychology.

Michael J. Behe
Darwin's Black Box, 2nd Edition

The Intelligent Design movement was born when a handful of scientists realized that nature exhibits characteristics that could not have evolved by random mutation. Michael Behe was at the forefront of this discovery and wrote about it in the first edition of the book published in 1996. Since then, *Darwin's Black Box* has established itself as the key text in the Intelligent Design movement—the one argument that must be addressed in order to determine whether Darwinian evolution is sufficient to explain life as we know it, or not.

Ten years later, with the publication of the 2nd edition, the *National Review* named *Darwin's Black Box* to their list of the 100 most important non-fiction works of the 20th century stating that it "overthrows Darwin at the end of the 20th century in the same way that quantum theory overthrew Newton at the beginning."

For this edition, Behe has written a major afterword tracing the state of the debate in the decade since it began. It is his first major new statement on the subject, and it will help ensure that the new edition continues to stand as essential for debates on Darwin across the country.

Darwin's Black Box helped to launch the Intelligent Design movement: the argument that nature exhibits evidence of design, beyond Darwinian randomness. Today, with the movement stronger than ever, Michael J. Behe updates the book with an important new Afterword on the state of the debate. —Time

Israel Finkelstein and Neil Asher Silberman
The Bible Unearthed

In this provocative work, leading scholars Israel Finkelstein and Neil Asher Silberman draw on recent archaeological research to present a dramatically revised portrait of ancient Israel and its neighbors. They argue that crucial evidence (or a telling lack of evidence) at digs in Israel, Egypt, Jordan, and Lebanon suggests that many of the most famous stories in the Bible—the wanderings of the patriarchs, the Exodus from Egypt, Joshua’s conquest of Canaan, and David and Solomon’s vast empire—reflect the world of the later authors rather than actual historical facts.

Challenging the fundamentalist readings of the scriptures and marshaling the latest archaeological evidence to support its new vision of ancient Israel, *The Bible Unearthed* offers a fascinating and controversial perspective on when and why the Bible was written and why it possesses such great spiritual and emotional power today.

Finkelstein is a professor of archaeology at Tel Aviv University. He is a leading figure in the archaeology of the Levant and the laureate of the 2005 Dan David Prize in the Past Dimension -- Archaeology. Finkelstein served for many years as the Director of the Institute of Archaeology at Tel Aviv University and is the co-Director of the Megiddo Expedition. Neil Asher Silberman is director of historical interpretation for the Ename Center for Public Archaeology and Heritage Presentation in Belgium.

Orwell’s Revenge

George Orwell’s bleak visions of the future, one in which citizens are monitored through telescreens by an insidious Big Brother, has haunted our imagination long after the publication of *1984*.

Orwell’s dystopian image of the telescreen as a repressive instrument of state power has profoundly affected our view of technology, posing a stark confrontational question: Who will be master, human or machine? Experience has shown, however, that Orwell’s vision of the future was profoundly and significantly wrong: The conjunction of the new communications technologies has not produced a master-slave relation between person and computer, but rather exciting possibilities for partnership.

“Concluding with a handy capsule history of telecommunications, Huber provocatively predicts the convergence of computing, television and the telephone in a myriad of mixed-media networks.” -- Publisher’s Weekly (1994)

Walter Lewin with Warren Goldstein
For the Love of Physics

Popular MIT professor Walter Lewin, whose riveting physics lectures made him a YouTube super-star, takes readers on a remarkably fun, inventive, and often wacky journey that brings the joys of physics to life

For more than thirty years as a renowned professor at the Massachusetts Institute of Technology, Lewin’s lectures made physics not only accessible but fun, whether putting his head in the path of a wrecking ball, supercharging himself with three hundred thousand volts of electricity, or demonstrating why the sky is blue and clouds are white. In *For the Love of Physics*, Lewin takes readers on a marvelous journey, opening our eyes as never before to the wonders of physics and its amazing ability to reveal the beauty and power embedded in our world.

Could it be true that we are shorter standing up than lying down? Why can we snorkel no deeper than about one foot below the surface? Why are the colors of a rainbow always in the same order, can we stretch a hand out and touch one? Using clear and simple explanations of phenomena we’ve always wondered about, such as what the big bang would have sounded like had anyone existed to hear it, Lewin surprises and delights with physics-based answers to even the most elusive questions.

Mario Livio
Brilliant Blunders

Drawing on the lives of five great scientists, this book illuminates the path to scientific discovery.

We all make mistakes. Nobody is perfect. And that includes five of the greatest scientists in history—Charles Darwin, William Thomson (Lord Kelvin), Linus Pauling, Fred Hoyle, and Albert Einstein. But the mistakes that these great luminaries made helped advance science. Indeed, as Mario Livio explains, science thrives on error, advancing when erroneous ideas are disproven. Their blunders were a necessary part of the scientific process. Collectively they helped to dramatically further our knowledge of the evolution of life, the Earth, and the

universe.

Mario Livio is an internationally known astrophysicist at the Space Telescope Science Institute (STScI) in Baltimore, Maryland. He is the author of *The Golden Ratio*, a highly acclaimed book about mathematics and art for which he received the International Pythagoras Prize and the Peano Prize; *The Equation That Couldn't Be Solved*; *Is God a Mathematician?*; and *The Accelerating Universe*.

He is the author of the forthcoming book *Galileo* tentatively scheduled for spring 2021.

Mario Livio
The Equation That Couldn't Be Solved

The Equation That Couldn't Be Solved describes the centuries-old quest that led to the mathematical explanation behind symmetry and order in the natural world.

What do Bach's compositions, Rubik's Cube, the way we choose our mates, and the physics of subatomic particles have in common? All are governed by the laws of symmetry, which elegantly unify scientific and artistic principles. Yet the mathematical language of symmetry—known as group theory—did not emerge from the study of symmetry at all, but from an equation that couldn't be solved.

For thousands of years mathematicians solved progressively more difficult algebraic equations, until they encountered the quintic equation, which resisted solution for three centuries. Working independently, two great prodigies ultimately proved that the quintic cannot be solved by a simple formula. These geniuses, a Norwegian named Niels Henrik Abel and a romantic Frenchman named Évariste Galois, both died tragically young. Their incredible labor, however, produced the origins of group theory.

Galileo

An “intriguing and accessible” (*Publishers Weekly*) interpretation of the life of Galileo Galilei, one of history’s greatest and most fascinating scientists, that sheds new light on his discoveries and how he was challenged by science deniers **from** bestselling author and astrophysicist Mario Livio.

Livio provides a new perspective into how Galileo reached his bold new conclusions about the cosmos and the laws of nature. A freethinker who followed the evidence wherever it led him, Galileo was one of the most significant figures behind the scientific revolution. He believed that every educated person should know science as well as literature, and insisted on reaching the widest audience possible, publishing his books in Italian rather than Latin.

Galileo was put on trial with his life in the balance for refusing to renounce his scientific convictions. He remains a hero and inspiration to scientists and all of those who respect science — which, as Livio reminds us in this important book, continues to be threatened today.

Mario Livio
Is God a Mathematician?

Bestselling author and astrophysicist Mario Livio examines the lives and theories of history’s greatest mathematicians to ask how—if mathematics is an abstract construction of the human mind—it can so perfectly explain the physical world.

Physicist and author Mario Livio brilliantly explores mathematical ideas from Pythagoras to the present day as he shows us how intriguing questions and ingenious answers have led to ever deeper insights into our world. This fascinating book will interest anyone curious about the human mind, the scientific world, and the relationship between them.

Marvin Minsky
The Society of Mind

Marvin Minsky -- one of the fathers of computer science and co-founder of the Artificial Intelligence Laboratory at MIT -- gives a revolutionary answer to the age-old question: "How does the mind work?"

Minsky brilliantly portrays the mind as a "society" of tiny components that are themselves mindless. Mirroring his theory, Minsky boldly casts *The Society of Mind* as an intellectual puzzle whose pieces are assembled along the way. Each chapter -- on a self-contained page -- corresponds to a piece in the puzzle. As the pages turn, a unified theory of the mind emerges, like a mosaic. Ingenious, amusing, and easy to read, *The Society of Mind* is an adventure in imagination.

Richard Rhodes
The Making of the Atomic Bomb

Twenty-five years after its initial publication, this Pulitzer Prize-winning book remains the definitive history of nuclear weapons and the Manhattan Project. From the turn-of-the-century discovery of nuclear energy to the dropping of the first bombs on Japan, the book details the science, the people, and the socio-political realities that led to the development of the atomic bomb.

Reading like a character-driven suspense novel, the book introduces the players in this saga of physics, politics, and human psychology—from FDR and Einstein to the visionary scientists who pioneered quantum theory and the application of thermonuclear fission, including Planck, Szilard, Bohr, Oppenheimer, Fermi, Teller, Meitner, von Neumann, and Lawrence.

From nuclear power's earliest foreshadowing in the work of H.G. Wells to the bright glare of Trinity at Alamogordo and the arms race of the Cold War, this dread invention forever changed the course of human history, and *The Making of The Atomic Bomb* provides a panoramic backdrop for that story.

Winner of the Pulitzer Prize and the National Book Award for Non-fiction and the National Book Critics Circle Award.

Richard Rhodes
Dark Sun

Pulitzer Prize-winning author Richard Rhodes tells the definitive, often shocking story of the politics and the science behind the development of the hydrogen bomb and the birth of the Cold War.

Based on secret files in the United States and the former Soviet Union, this monumental work of history discloses how and why the United States decided to create the bomb that would dominate world politics for more than forty years.

"A book of formidable range...draws on a vast array of sources, melding previous scholarship with an abundance of fresh material....Rhodes writes with a sharp eye for anecdote, character and political context....The result is a brilliantly rich and vivid account of the Cold War."— The New York Times Book Review

B.F. Skinner
Science and Human Behavior

A detailed study of scientific theories of human nature and the possible ways in which human behavior can be predicted and controlled—from one of the most influential behaviorists of the twentieth century and the author of *Walden Two*.

B.F. Skinner is best known for developing the theory of behaviorism he called operant conditioning. His research was rooted in a view that classical conditioning was too simplistic to be a complete explanation of complex human behavior. Instead, he believed that the best way to understand behavior is to look at the causes of an action and its consequences.

Stephen E. Ambrose *Band of Brothers*

Stephen E. Ambrose's iconic *New York Times* bestseller about the ordinary men who became the World War II's most extraordinary soldiers: Easy Company, 506th Parachute Infantry Regiment, 101st Airborne Division, US Army. Over one million copies of the book has been sold since its initial publication in 1992.

This is the story of the men who fought, of the martinet they hated who trained them well, and of the captain they loved who led them. E Company was a company of men who went hungry, froze, and died for each other, a company that took 150 percent casualties, a company where the Purple Heart was not a medal—it was a badge of office.

A new foreword by Tom Hanks, who with Stephen Spielberg adapted the book into HBO's Emmy Award-winning acclaimed miniseries **BAND OF BROTHERS**

Stephen E. Ambrose *D-Day*

Bestselling historian Stephen E. Ambrose's *D-Day* is the definitive history of World War II's most pivotal battle, a day that changed the course of history

Ambrose portrays the faces of courage and heroism, fear and determination—what Eisenhower called “the fury of an aroused democracy”—that shaped the victory of the citizen soldiers whom Hitler had disparaged. Drawing on more than 1,400 interviews with American, British, Canadian, French, and German veterans, Ambrose reveals how the original plans for the invasion had to be abandoned, and how enlisted men and junior officers acted on their own initiative when they realized that nothing was as they were told it would be.

Miles Davis

Miles: The Autobiography

Universally acclaimed as a musical genius, Miles Davis was one of the most important and influential musicians in the world. *Miles: The Autobiography*, like Miles himself, holds nothing back. He speaks frankly and openly about his drug problem and how he overcame it. He condemns the racism he encountered in the music business and in American society generally. And he discusses the women in his life. But above all, Miles talks about music and musicians, including the legends he has played with over the years: Bird, Dizzy, Monk, Trane, Mingus, and many others.

The man who gave us some of the most exciting music of the twentieth century here gives us a compelling and fascinating autobiography, featuring a concise discography and thirty-two pages of photographs.

Anne Frank Remembered

The #1 international bestseller recounts Miep Geis's own story of helping to hide the Frank family from the Nazis for two years during World War II.

For the millions moved by *Anne Frank: The Diary of a Young Girl*, here is Miep Gies's astonishing account of how she and her husband hid the Franks and others from the Nazis. Like thousands of unsung heroes of the Holocaust, they risked their lives every day to bring food, news, and emotional support to its victims. From her remarkable childhood as a World War I refugee to the moment she places a small, red-orange-checkered diary -- Anne's legacy -- into Otto Frank's hands, Miep Gies remembers her days with simple honesty and shattering

clarity. Each page rings with courage and heartbreaking beauty.

Walter Isaacson
Kissinger

This 2005 reissue of the #1 *New York Times* bestseller is the definitive biography of former Secretary of State Henry Kissinger by the bestselling author of *Steve Jobs*, *Benjamin Franklin*, *Einstein*, and *Leonardo da Vinci*.

By the time Henry Kissinger was made secretary of state in 1973, he had become, according to the Gallup Poll, the most admired person in America and one of the most unlikely celebrities ever to capture the world's imagination. Yet Kissinger was also reviled by large segments of the American public, ranging from liberal intellectuals to conservative activists. Kissinger explores the relationship between this complex man's personality and the foreign policy he pursued.

Drawing on extensive interviews with Kissinger as well as 150 other sources, including U.S. presidents and his business clients, this first full-length biography makes use of many of Kissinger's private papers and classified memos to tell his uniquely American story. The result is an intimate narrative, filled with surprising revelations, that takes this grandly colorful statesman from his childhood as a persecuted Jew in Nazi Germany, through his tortured relationship with Richard Nixon, to his later years as a globe-trotting business consultant.

This reissued edition includes a new introduction that addresses two questions: Why does Henry Kissinger continue to fascinate us? How do his ideas resonate in the world today?

Henry Kissinger
Crisis

In this extraordinary and unique historical record, Kissinger reveals what actually goes on--day by day, minute by minute--behind the scenes, at the highest level, in a diplomatic crisis by drawing upon hitherto secret transcripts of his telephone conversations during the Yom Kippur War (1973) and the last days of the Vietnam War (1975).

This book consists of material from Kissinger's hitherto sealed files in the US National Archives and reveals for the first time EXACTLY what was said between himself, Presidents Nixon and Ford, world leaders, diplomats, and colleagues during periods of serious conflict and crisis.

Donald L. Miller
Masters of the Air

The riveting history of the American Eighth Air Force in World War Two, the story of the young men who flew the bombers that helped bring Nazi Germany to its knees, brilliantly told by historian Donald Miller and soon to be a major HBO series.

Masters of the Air is a story of life in wartime England and in the German prison camps, where tens of thousands of airmen spent part of the war. It ends with a vivid description of the grisly hunger marches captured airmen were forced to make near the end of the war through the country their bombs destroyed.

Drawn from recent interviews, oral histories, and American, British, German, and other archives, *Masters of the Air* is an authoritative, deeply moving account of the world's first and only bomber war.

The book will be part of a 10-part mini-series produced by Steven Spielberg and Tom Hanks. The series will be titled *Masters of the Air* and will be the third part of their trilogy which includes *Band of Brothers* (Stephen Ambrose) and *The Pacific*.

The film stars Austin Butler, who has received well deserved acclaim for his portrayal of Elvis in the 2022 Baz Lurhmann movie. Other include Nate Mann and Freddy Carter, plus there is a host of young British talent, including Callum Turner, Raff Law, Josh Bolt and Anthony Boyle. Fresh from directing hit Bond movie *No Time To Die*, Cary Fukunaga has now taken charge of this ten-part series about the final year of World War Two. Set to release late 2022/early 2023.

Miles J. Unger
Machiavelli

A lively, authoritative biography of Niccolo Machiavelli, who changed the way we think about politics and even about human nature, a seminal thinker and self-made man -- arguably the first modern man -- whose work has been misunderstood for hundreds of years.

Niccolò Machiavelli is the most influential political writer of all time. His name has become synonymous with cynical scheming and the selfish pursuit of power, but the real Machiavelli, says Miles Unger, was a deeply humane and perceptive writer whose controversial theories were a response to the violence and corruption he saw around him. Unger places *The Prince* and *The Discourses* in their proper context and explains why they were such revolutionary works and why they remain valuable today.

Magnifico

A superb biography of one of the greatest and most fascinating figures of the Renaissance, Lorenzo de' Medici, focusing on his role as a brilliant and sometimes ruthless statesman who more than anyone else was responsible for the artistic flowering of Florence, the city where the Renaissance first blossomed.

Lorenzo de' Medici was the patron of such artists as Botticelli, Ghirlandaio, Fra Lippo Lippi, and Leonardo, among others. Had he done nothing else, history would remember him. But he also preserved the independence of the fractious Florentine Republic during a tumultuous half-century, and Unger focuses on Lorenzo's skills as a dominant leader of his time.

Magnifico is a vividly colorful portrait of Lorenzo de' Medici, the uncrowned ruler of Florence during its golden age.

Michelangelo

The life of perhaps the most famous, most revolutionary artist in history, told through the story of six of his magnificent masterpieces.

Michelangelo stands alone as a master of painting, sculpture, and architecture, a man who reinvented the practice of art itself. Throughout his long career he clashed with patrons by insisting that he had no master but his own demanding muse. Michelangelo was ambitious, egotistical, and difficult, but through the towering force of genius and through sheer pugnaciousness, he transformed the way we think about art.

Jackie Collins ***Hollywood Wives***

An international bestseller when it was published in 1983, *Hollywood Wives* is a glittering, sizzling account of Hollywood's elite and their seamy foibles.

Hollywood Wives tells the stories of several women in Hollywood, ranging all the way from long-time talent agents and screenwriters to vivacious screen vixens and young, innocent newcomers. They lunch at Ma Maison and the Bistro on salads and hot gossip. They cruise Rodeo Drive in their Mercedes and Rolls, turning shopping at Giorgio and Gucci into an art form. They pursue the body beautiful at the Workout and Body Asylum. Dressed by St. Laurent and Galanos, they dine at the latest restaurants on the rise and fall of one another's fortunes. They are the Hollywood Wives, a privileged breed of women whose ticket to ride is a famous husband. Hollywood. At its most flamboyant.

After the novel's international success, it was adapted as a television miniseries by producer Aaron Spelling that aired in February 1985. It was a ratings hit, and one of the most successful mini-series of the 1980s.

"Which one of you bitches is my mother?"

Four elegant, successful, and sophisticated women in their forties are called to New York's Pierre Hotel to meet Lili -- a beautiful, young, and notoriously temperamental Hollywood movie star. None of the women knows exactly why she is there; each has a reason to hate Lili and each of them is astonished to see the others. They are old friends who share a guilty secret and who have for years been doing their best to keep that secret quiet. Their lives are changed forever, however, when Lili suddenly confronts them. When the women refuse to answer her, Lili proceeds to travel around the world through the playgrounds of the rich and famous, seeking to answer the question that has obsessed and almost destroyed her.

From Paris to London, from the boardroom to the bedroom, *Lace* takes the reader into the rarified world of five unforgettable women who are as beautiful, as complex and as strong as...lace.

Colleen McCullough
Morgan's Run

The #1 New York Times bestselling novel that takes readers to the birth of modern Australia with a breathtaking saga brimming with drama, history, and passion.

At the center of the novel is Richard Morgan, a devoted husband, loving father, and hardworking craftsman. By the machinations of fate and the vagaries of the 18th-century English judicial system, he is consigned as a convict to the famous "First Fleet," which set sail to the new colony of Australia.

When the book begins, Morgan is a contented man--happily married, with a child he adores. Then, piece by piece, his idyll crumbles until he finds himself led into an ambiguous relationship with a beautiful young woman whose dissolute protector seeks vengeance on Morgan to protect his own skin. Morgan endures the agonies of bereavement and financial loss, incarceration in prison and aboard the notorious "hulks," then the horrors of the journeys to Botany Bay and Norfolk Island, where he finds against all odds a new love and a new life.

Colleen McCullough
The Touch

A sweeping, epic novel that recounts the interlocked destinies of a Scots-Australian family and a Chinese family the whole story of the birth of modern Australia by the internationally bestselling author of *The Thorn Birds*.

At the novel's center is Alexander Kinross, remembered as a young man in his native Scotland only as a shiftless boilermaker's apprentice and a godless rebel. But when, years later, he writes from Australia to summon his bride, his Scottish relatives quickly realize that he has made a fortune in the gold fields and is now a man to be reckoned with.

Arriving in Sydney after a difficult voyage, the sixteen-year-old Elizabeth Drummond meets her husband-to-be and discovers to her dismay that he frightens and repels her. Offered no choice, she marries him and is whisked at once across a wild, uninhabited countryside to Alexander's own town. Isolated in Alexander's great house, with no company save Chinese servants, Elizabeth finds that the intimacies of marriage do not prompt her husband to enlighten her about his past life -- or even his present one.

Vaddey Ratner
In the Shadow of the Banyan

A beautiful celebration of the power of hope, this *New York Times* bestselling novel tells the story of a girl who comes of age during the Cambodian genocide.

For seven-year-old Raami, the shattering end of childhood begins with the footsteps of her father returning home in the early dawn hours, bringing details of the civil war that has overwhelmed the streets of Phnom Penh, Cambodia's capital. Soon the family's world of carefully guarded royal privilege is swept up in the chaos of revolution and forced exodus. Over the next four years, as the Khmer Rouge attempts to strip the population of every shred of individual identity, Raami clings to the only remaining vestige of her childhood—the mythical legends and poems told to her by her father. In a climate of systematic violence where memory is sickness and justification for execution, Raami fights for her improbable survival.

Displaying the author's extraordinary gift for language, *In the Shadow of the Banyan* is a brilliantly wrought tale of human resilience.

Contact

Pulitzer Prize-winner Carl Sagan imagines the greatest adventure of all... the discovery of an advanced civilization in the depths of space. December, 1999, a multinational team journeys out to the stars, to the most awesome encounter in human history.

When a signal is discovered that seems to come from far beyond our solar system, a multinational team of scientists decides to find the source. What follows is an eye-opening journey out to the stars to the most awesome encounter in human history. Who—or what—is out there? Why are they watching us? And what do they want with us?

In 1980 Sagan made history with his award-winning PBS TV series, *Cosmos: A Personal Voyage*, which became the most widely watched series in the history of American public television. Sagan began a cultural phenomenon which brought science back into popular consciousness.

The book was adapted for a major motion picture by Warner Bros. in 1997. It was directed by Robert Zemeckis and starred Jodie Foster, Matthew McConaughey, James Woods, Tom Skerritt, John Hurt, Angela Bassett, Rob Lowe and David Morse. *Contact* grossed over \$100,920 in the U.S. and \$70,200,000 in foreign countries, reaching a worldwide total of over \$171,000,000.

George Shuman
18 Seconds

In his gripping debut, George D. Shuman crafts a pulse-pounding, tension-filled thriller about two brave women -- one with uncanny psychic abilities -- who unite to catch a murderous madman...before he finds them first.

Thirty years after a deadly traffic accident landed Earl Sykes in prison, he is back on the streets of Wildwood, New Jersey -- and back for revenge. He is also feeding his perverse appetite for abducting young female victims -- the same crimes he committed years ago for which he was never caught. Police lieutenant Kelly O'Shaughnessy is bewildered by the disappearance of several young women from the boardwalk -- crimes horrifyingly reminiscent of unsolved cases from the seventies. Reluctant to ask for help but desperate to stem the bloodshed, Kelly enlists investigative consultant Sherry Moore. Blind and beautiful, Sherry has the extraordinary ability to "see" the deceased's last eighteen seconds of memory by touching the corpse. As they join forces to discover the killer's identity, the women unwittingly become the hunted -- each step drawing them closer to the deadly clutches of a homicidal monster.

Carlos Castaneda

Carlos Castaneda was an author of a series of books that described his training in traditional Native American shamanism. He had a Ph.D. in anthropology when he met a Yaqui shaman named Don Juan Matus in 1960.

Castaneda's experiences with Don Juan inspired the works for which he is known. The books contain descriptions of paranormal or magical experiences, several psychological techniques, Toltec magic rituals, shamanism and experiences with psychoactive drugs (e.g. peyote). According to Castaneda, the most significant facts in a person's life are his possession of awareness and its impending termination at death. The primary goal of a Toltec "Warrior" is the continuation of his awareness after bodily death: to "dart past the Eagle and be free", in the words of the tradition, where the Eagle is the force which consumes the awareness of all living beings.

The books and Castaneda have been controversial for many years. Supporters claim the books are either true or at least valuable works of philosophy and descriptions of practices, which enable an increased awareness.

His 12 books have sold more than 8 million copies in 17 languages.

The Second Ring of Power (1978)

Castaneda encounters his greatest test on the journey towards impeccability and freedom: to outwit and overpower the sorcery of Doña Soledad, herself transformed from a defeated and meaningless life to a warrior, a hunter and a "stalker of power."

Now the combat will begin. Now the journey will continue. Till the last danger is faced...the final paradox embraced.

The Eagle's Gift (1981)

Castaneda takes the reader into the very heart of sorcery, challenging both imagination and reason, shaking the very foundations of our belief in what is 'natural' and 'logical'.

His landscape is full of terrors and mysterious forces, as sharply etched as a flash of lightning on the deserts and mountains where Don Juan takes him to pursue the sorcerer's knowledge—the knowledge that it is the Eagle that gives us, a spark of awareness, that it expects to reclaim at the end of our lives. Castaneda tells how he, himself, upon witnessing such a sight, jumped into the abyss.

32 printings of the paperback edition

The Fire From Within (1984)

Fire from Within is the author's most thought-provoking book, one in which Castaneda, under the tutelage of Don Juan and his "disciples," at last constructs, from the teachings of Don Juan and his own experiences, a stunning portrait of the "sorcerer's world" that is crystal-clear and dizzying in its implications.

Each of Carlos Castaneda's books is a brilliant and tantalizing burst of illumination into the depths of our deepest mysteries, like a sudden flash of light, like a burst of lightning over the desert at night, which shows us a world that is both alien and totally familiar -- the landscape of our dreams.

The Power of Silence (1987)

The Power of Silence is a brilliant flash of knowledge that illuminates the far reaches of the human mind. Through Don Juan's mesmerizing stories, the true meaning of sorcery and magic is finally revealed.

Honed in the desert of Sonora, the visions of Don Juan give us the vital secrets of belief and self-realization that are transcendental and valid for us all. It is Castaneda's unique genius to show us that all wisdom, strength, and power lie within ourselves -- unleashed with marvelous energy and imaginative force in the teachings of Don Juan -- and in the writings of his famous pupil, Carlos Castaneda
